

# Contents

<b>Chapter 1 - Basic Techniques</b>	- - - - -	<b>1</b>
A Little Mathematics	- - - - -	1
The Fourier Transform and Fourier Series	- - - - -	2
Orthogonal Functions	- - - - -	4
Orthogonal Coordinate Systems	- - - - -	5
Electronic Basics	- - - - -	7
Passive Circuits	- - - - -	8
Active Circuits	- - - - -	11
Newton's Equations	- - - - -	15
The Simple Harmonic Oscillator	- - - - -	16
Coupled Systems	- - - - -	17
Basic T-Matrices	- - - - -	19
Series and Parallel Elements in a T-matrix	- - - - -	20
Correlation and Spectral Analysis	- - - - -	21
Modeling Transfer Functions	- - - - -	23
Summary	- - - - -	25
<b>Chapter 2 - Transducer Mechanisms</b>	- - - - -	<b>26</b>
Moving Coil Motor Structure	- - - - -	26
Variable Reluctance Motor Structure	- - - - -	27
Magnetic Circuits	- - - - -	30
The Electrostatic Motor	- - - - -	34
The Piezoelectric Motor Structure,	- - - - -	36
A Simply Supported Piston	- - - - -	38
A Simple Driven Piston Example	- - - - -	39
Summary	- - - - -	41
<b>Chapter 3 - Acoustics</b>	- - - - -	<b>42</b>
The Wave Equation	- - - - -	42
The Helmholtz Equation in Rectangular Coordinates	- - - - -	43
Cylindrical Coordinates	- - - - -	46
Spherical Coordinates	- - - - -	49
A Spherical Example	- - - - -	51
A Cylindrical Example	- - - - -	58
The Cylindrical Near Field	- - - - -	65
Summary	- - - - -	70
<b>Chapter 4 - Simple Radiation</b>	- - - - -	<b>71</b>
Circular Disk	- - - - -	71
Examples of Circular Aperture Radiation	- - - - -	75
The Rectangular Aperture As a Transform Pair	- - - - -	78
Generalized Rectangular Radiation	- - - - -	80
Transform Relationships for Circular Apertures	- - - - -	83

Non-planar Sources in a Flat baffle - - - - -	85
Summary - - - - -	87
<b>Chapter 5 - Enclosures</b> - - - - -	<b>89</b>
The Simple Closed Box - - - - -	89
An Enclosure in T-matrix Format - - - - -	95
T-matrix and Lumped Parameter - - - - -	96
A Ported Enclosure Using T-Matrices. - - - - -	100
The Mechanical Acoustical Interface - - - - -	103
Front and Rear Port Radiation - - - - -	105
General Enclosure Types, - - - - -	108
Front – Direct, Rear – Direct - - - - -	109
Front – Direct, Rear – Closed - - - - -	110
Front – Direct, Rear – Ported – Duct - - - - -	110
Front – Direct, Rear – Ported – Passive Radiator - - - - -	110
Front – Direct, Rear – Ported – Acoustic Lever <sup>TM</sup> - - - - -	111
Front – Ported, Rear – Direct - - - - -	115
Front – Ported – Duct, Rear – Closed - - - - -	115
Front – Ported, Rear – Ported - - - - -	118
Internal Ported - - - - -	123
Summary - - - - -	125
<b>Chapter 6 - Waveguides</b> - - - - -	<b>126</b>
Historical Notes - - - - -	126
Waveguide Theory - - - - -	130
Waveguide Geometries - - - - -	136
The Oblate Spheroidal Waveguide - - - - -	137
Approximate Numerical Calculations, - - - - -	147
Treatment of Mouth Diffraction - - - - -	152
Diffraction Horns - - - - -	161
Summary - - - - -	163
<b>Chapter 7 - Crossovers</b> - - - - -	<b>164</b>
Background - - - - -	164
Two-Way Crossovers - - - - -	166
Examples - - - - -	169
Passive Electrical Effects - - - - -	173
Acoustic Filters As Crossover Components - - - - -	178
Summary - - - - -	179
<b>Chapter 8 - Room Acoustics</b> - - - - -	<b>181</b>
The Rectangular Room - - - - -	181
A Wall With an Impedance - - - - -	189
Fundamental Concepts in Small Room Acoustics - - - - -	192
Source Placement - - - - -	196

Summary	202
<b>Chapter 9 - Transducer Arrays</b>	<b>203</b>
Simple Point Source Arrays	203
Spherical Arrays	205
Displaced Spherical Arrays	208
Line Arrays in Cylindrical Coordinates	210
The Effect of Wavefront Curvature on Line Arrays	214
Cardiod Enclosures	216
Passive Low Frequency Directivity	219
Summary	221
<b>Chapter 10 - Distortion</b>	<b>223</b>
Nonlinear Systems Theory	223
Loudspeaker Component Nonlinearity	226
Simulated Results of a Nonlinear Transducer	233
Background On Distortion Perception	236
The Psychoacoustics of Distortion Perception	237
Thermal Nonlinearity	240
Summary	245
<b>Chapter 11 - Microphones</b>	<b>246</b>
Background	246
Microphone Noise	247
A Microphone Example	249
Microphone Enclosures	252
Microphone Pattern Control	254
Microphone Arrays	255
Summary	258
<b>Chapter 12 - Measurements</b>	<b>259</b>
Philosophy of Measurement	259
Measuring the First Mode Parameters	260
Polar Response Measurement	266
Measuring Component Nonlinearity	273
Measuring the Thermal Parameters	277
Summary	278
<b>Chapter 13 - Psychoacoustics</b>	<b>279</b>
Anatomy and Physiology	279
Theories of Hearing	280
Psychoacoustical Measurement Protocols	284
Masking	286
Loudness	289
Binaural Hearing	294
Summary	295
